LUITBIZ DMS MODULES

LUITBIZ DMS BASIC

LuitBiz DMS Basic allows users to upload and share documents with LuitBiz DMS View Users, search and retrieve those documents and manage different versions of the documents. Additionally, it allows users to tag documents and manage documents communications & knowledge base.

LUITBIZ DMS ENTERPRISE

In addition to the features of LuitBiz DMS Basic, LuitBiz DMS Enterprise allows users to approve documents with electronic signatures without any manual intervention. Workflow templates can be defined by Document Group Leaders for streamlining the approval process.

LUITBIZ DMS VIEW USER

The "View User" module of LuitBiz DMS becomes handy when you want to share only certain documents with some users either forever or for a finite time period. The "View Users" can be connected either to LuitBiz DMS Basic or Enterprise and they can only view documents intended for them and ask questions.
